

Short review and endorsement of *The Language of MA* by Kaarina Kailo from Finland, 10th of June 2015.

What a wonderful book your MA! I have now read it in full and must say it is the best treatise on matriarchy!! Not to belittle the pioneering works, simply, this book is so pedagogically astute and perfect that it also helps me now sort out the mess of details re. Finno-Ugric deities....

The book is excellent and I will do a review if it is useful.

I especially liked your term MOTHERLAND VS: FATHERLAND and would like to adapt it as the umbrella term for matriarchal, matristic, matrilineal etc. societies when I need a general term....

The book is so readable and accessible to the "normative" reader that I must take you as my role model for writing... complex stuff but you manage to organize everything so well. This is a must for anyone wishing to understand the complexities of the historically layered matriarchal traces

I work on the symbolic language in textiles, as well, but your book helps with that too!

Bravo! Ka--
